hello
rain..

rain is only a problem

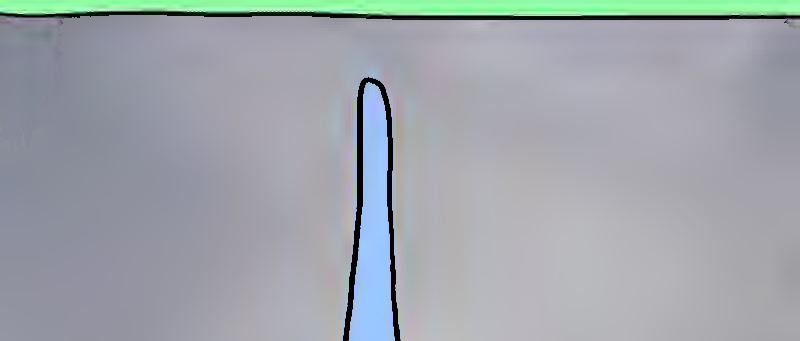
Rain is only a problem
if you don't want
to get wet

Johand didn't want to go outside in case his face washed away.

There's something exhilerating about being outside in the rain

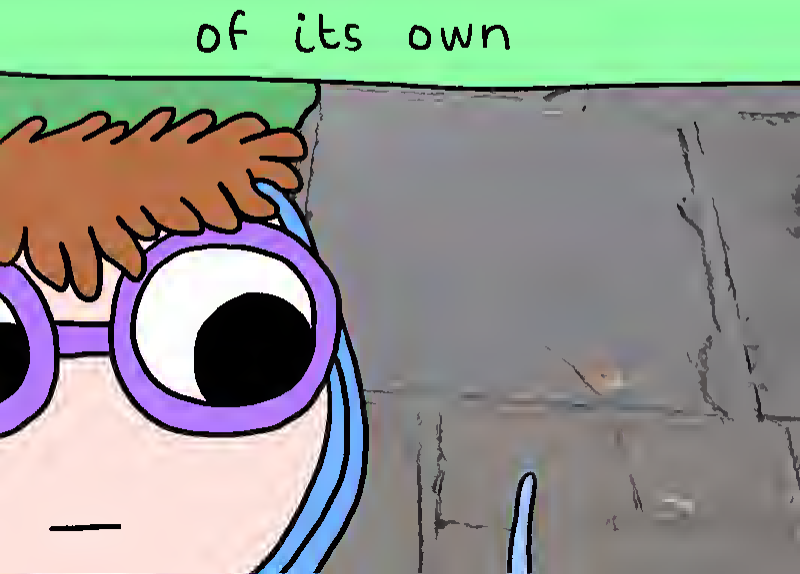
but it is difficult
to capture it.

water on my cracked screen
makes it hard to press
the camera button



but while I was trying

but while I was crying,
a raindrop took a photo
of its own



this is what it looks like:
